

## Software Engineer

### About Us:

Bounteous x Accolite is a premier end-to-end digital transformation consultancy, partnering with the world's most ambitious brands. With 5,000+ experts across the Americas, EMEA, and APAC, we combine strategy, design, engineering, and data to craft transformative digital experiences.

We harness Co-innovation and AI to spark bold ideas, power smarter solutions, and deliver lasting value. Our uncompromising standards for technical and domain expertise enable us to create innovative solutions across Strategy, Analytics, Digital Engineering, Cloud, Data & AI, Experience Design, Digital Experience Platforms, and Marketing.

Discover more about our impactful work and expertise by visiting [www.bounteous.com](http://www.bounteous.com).

### The Role

As a Software Engineer, you will gain hands-on experience working on real projects that span the full software development lifecycle. You'll collaborate with engineers, analysts, developers, and industry experts, learning how to translate business needs into solutions that improve usability, strengthen performance, and create tangible value for end users.

This role is designed to accelerate your technical growth and give you practical exposure to modern engineering practices through high-impact, global technology projects.

### What You'll Do

- Contribute across the software development lifecycle: analysis, design, coding, testing, deployment, and support.
- Write clean, efficient, and maintainable code aligned with best practices.
- Build and integrate features that enhance functionality and user experience.
- Support verification through unit and integration testing to ensure quality.
- Participate in debugging, troubleshooting, and live system improvements.
- Incorporate feedback from peers and stakeholders to strengthen solutions.
- Collaborate in agile teams, learning from mentorship and shared expertise.
- Assist in creating technical documentation and knowledge-sharing materials.

### What We're Looking For

- Pursuing B.E./B.Tech./M.E./M.Tech./M.Sc. in Computer Science, MCA, or other related technical fields.
- Consistent academic performance (minimum 60% / 6 CGPA) with no active backlogs.
- Strong understanding of programming concepts, data structures, and algorithms.
- Familiarity with at least one programming language: Java, Python or C++.
- Analytical mindset, problem-solving skills, and eagerness to learn in a collaborative environment.

#### **Location:**

Bengaluru, Chennai, Gurugram, Hyderabad, Mumbai, or any of our India collaboration centres.

#### **Why Join Us**

At Bounteous x Accolite, you contribute to meaningful projects, not just shadow them. You'll gain:

- Hands-on exposure to modern engineering practices and AI-driven solutions.
- Opportunities to work with global teams and diverse industries.
- Structured mentorship to accelerate your growth.
- A collaborative culture that values curiosity, innovation, and impact.
